

# **Requirements for “Initial Management Report”**

Deadline - Thursday Week 4 at 5.00pm(\*)  
SENG3011

Every team must hand in a report containing the following sections:

## **Initial Use Cases**

Develop your initial use cases based on the requirements given (1 or 2 is enough). Ask the LIC/mentor for clarifications or additional information.

## **Initial Design**

1. Develop an initial architecture diagram, showing the essential components of your system
2. Show interaction or sequence diagrams for each use case defined
3. Present and justify implementation language and environment that will be used.

## **Initial Project Plan**

Provide a project plan showing team member responsibilities, work arrangements and any information team members will be using to coordinate their activities. You should also mention any software tools used by the team to assist project management.

The report is meant to be a working document so some information will be incomplete at this stage. 4-5 pages should be enough.

Each group must submit the report Thursday Week 4 at 5pm(\*). The report must be packaged under one file called report1.zip (max size 4Mb) and submitted via WebCMS.

(\*)The deadline that is shown on WebCMS will be later than the official one, you need to ignore it
